

$$\text{لا} = \text{ا} + \text{ل}$$

By right, the new glyph should be as (لَ), but it appears as (لا). Hence, it must be a more simple way in the Font Creator to solve the problem below:

$$\text{ا} + \text{لَ} = \text{ا} + \text{َ} + \text{ل}$$
$$\text{(لا)} \quad \text{لَ} =$$

The new glyph should be as in the bracket but with the Arabic Fatha be on top of Lam, not on top of Alef.
